

## **Infection Control Market is estimated to be US\$ 37.4 billion by 2022 with a CAGR of 5.8% over the forecast period (2022-2032)**

[Infection control](#) is a practical sub-discipline of epidemiology concerned with preventing healthcare-associated infection. Infection prevention and control is critical in hospitals and clinics because it prevents the spread of illnesses in these environments. Infection control refers to policies and practices used in hospitals and other healthcare settings to control and minimize the spread of illnesses with the goal of lowering infection rates. Infection control programmes were created with the primary goal of focusing on HAI surveillance and combining basic epidemiological knowledge to identify HAI risk factors. Infection control helps in preventing spread of infections in healthcare. Training and education courses on infection control for healthcare providers will help in reducing spread of infection. Contact, airborne, droplets and infection control standard are the methods of infection control. Personal protective equipment, hand hygiene, respiratory & cough hygiene, self-management of linen, self-management & care of environment, self-management of blood & body fluids, self-management of equipment, placement & infection assessment are the Standard Infection Control Precautions. Hand washing is an effective way in preventing spread of infections in hospital. However, rise in prevalence of hospital acquired infection is expected to give rise in Infection Control market growth.

The report “Infection Control Market, By Type (Disinfectors, Sterilization, Equipment, Consumable & Accessories, and Services), By End-Users (Hospitals, Clinical Laboratories, Pharmaceutical Companies, and Medical Device Companies), and By Region (North America, Europe, Asia Pacific, Latin America, and Middle East & Africa) - Trends, Analysis and Forecast till 2032”

### **Key Highlights:**

- In December 2021, The Centers for Disease Control and Prevention (CDC) announced that it has awarded \$22 million to nearly 30 organizations around the world to fight antimicrobial resistance (AR) and other healthcare threats by forming two new networks: the Global Action in Healthcare Network (GAIHN) and the Global AR Laboratory and Response Network (Global AR Lab & Response Network).
- In November 2021, Abundant Hospice, based in Texas, recently established a new inpatient care facility that uses a cleaning robot to sterilize patient rooms and common areas. The hospice built the center with staff and patient safety as a top focus when the epidemic hit the country last year.

### **Analyst View:**

The infection control industry is predicted to develop in response to the rising frequency of hospital-acquired infections. Other factors expected to aid in the expansion of the infection control market over the forecast period include greater awareness about various infections and higher hospital admissions as a result of the fast growing population. Furthermore, rising demand for non-disposable surgical equipment in hospitals as well as an increase in the number of surgical procedures are likely to propel the worldwide infection control market forward throughout the forecast period. As a result, market competition is intensifying, and both big international corporations and start-ups are vying to establish position in the market.

#### **Key Market Insights from the report:**

Infection Control Market accounted for US\$ 37.4 billion in 2022 and is estimated to be US\$ 63.1 billion by 2032 and is anticipated to register a CAGR of 5.8%. The Infection Control Market is segmented based on Type, End-Users and Region.

- Based on Type, Infection Control Market is segmented into Disinfectors, Sterilization, Equipment, Consumable & Accessories, and Services.
- Based on End-Users, Infection Control Market is segmented into Hospitals, Clinical Laboratories, Pharmaceutical Companies, and Medical Device Companies.
- By Region, the Infection Control Market is segmented into North America, Europe, Asia Pacific, Latin America, Middle East & Africa.

#### **Competitive Landscape & their strategies of Infection Control Market:**

The prominent players operating in the Infection Control Market includes, 3M Company, Steris Corporation, BioInteractions Ltd., Cantel Medical Corp, Getinge AB, Johnson & Johnson Services Inc., Danaher, Ecolab, Sterigenics International LLC., Belimed AG, Advanced Sterilization Products, and others.

The market provides detailed information regarding the industrial base, productivity, strengths, manufacturers, and recent trends which will help companies enlarge the businesses and promote financial growth. Furthermore, the report exhibits dynamic factors including segments, sub-segments, regional marketplaces, competition, dominant key players, and market forecasts. In addition, the market includes recent collaborations, mergers, acquisitions, and partnerships along with regulatory frameworks across different regions impacting the market trajectory. Recent technological advances and innovations influencing the market are included in the report.
